

IEEE EMBEDDED SYSTEMS LETTERS

A PUBLICATION OF THE IEEE COUNCIL ON ELECTRONIC DESIGN AUTOMATION

CALL FOR PAPERS

Papers are accepted on a rolling basis. To be considered for the inaugural issue, please observe the following deadlines:

Manuscript Due: June 6, 2009

Notification to Authors: June 27, 2009

Final Draft Due for Publication: July 3, 2009

IEEE Embedded Systems Letters seeks to provide a forum for quick dissemination of research results in the domain of embedded systems with a target turn-around time of three months. Submissions are welcome on any topic in the broad area of embedded systems and embedded software, especially but not limited to:

- Architectural and micro-architectural design of embedded systems: micro-architectures, customizable processors, signal processing, multi-processor SOC and NOC architectures;
- Design automation algorithms, methods, and tools for VLSI implementations: specification languages, models and synthesis methods;
- Component modeling and component-based development methodologies; hardware-software co-design, co-design methodologies, design exploration tools;
- Compilation and managed runtime environments for embedded systems; Profiling, measurement, analysis techniques for embedded applications; OS, middleware and support systems for embedded-system design;
- Programming languages and software engineering for embedded or real-time applications;
- Non-functional aspects of embedded systems including low power, reliability, dependability and availability. Low power design and power management;
- Testing, validation, and verification of embedded software;
- Embedded sensor networks and embedded control systems: design, analysis and application to cyber-physical systems;
- Embedded systems security;
- Applications of embedded systems and software: military, avionics, and automotive: case studies, applications of new methodologies and tools to applications with increased system heterogeneity and scale.

Submitted letters must be four pages or fewer, including all figures, tables, and references. Submissions exceeding this length will be returned without review. Papers should use 7.875in x 10.75in (20cm x 27.30cm) trim size and the IEEE transactions two-column format in 9-pt. font. In word counts, this corresponds to roughly 2200 words.

Submissions to IEEE ESL must consist of original work that has not been previously published nor is currently under review elsewhere.

Please submit at <http://mc.manuscriptcentral.com/les-ieee>.

EDITORIAL BOARD

Rajesh K, Gupta, UC San Diego
Editor-In-Chief

Anand Raghunathan, Purdue
Embedded Security

Tarek Abdelzaher, University of Illinois, Urbana-Champaign
Cyber-physical Systems, Real-Time Systems

Sandeep Shukla, Virginia Polytechnic
Embedded Systems Specification and Modeling

Tom Conte, Georgia Tech
Embedded Processor Architectures and Microarchitectures

Peter Corke, CSIRO, Kenmore, Australia
Embedded Sensor Platforms

Ryan Kastner, UC San Diego
Reconfigurable Systems

David Atienza, EPFL, Switzerland
Multi-Processor Systems

Donatella Sciuto, Politecnico Milano
Design Methods for Embedded Systems

Paulo Tabuada, UC Los Angeles
Embedded Control & Hybrid Systems

Sanjit Seshia, UC Berkeley
Dependable Systems, Design Automation, Verification

Hiroyuki Tomiyama, Nagoya Univ.
Embedded Processors

Tulika Mitra, NUS, Singapore
Compilers

S Ramesh, GM R&D, Bangalore, India
Automotive Embedded Systems.
